

- 8:00** **Registration**
- 8:30** Application of Microtechnologies to Implantable Systems and Surgical Tools
Agnès Bonvilain - Associate Professor, TIMA Laboratory (CNRS – Grenoble INP – UJF), France
- 8:55** New perspectives from micro and nanotechnologies in Medical Diagnostics
Jean Chabbal - Head of the Technologies for Healthcare Division, CEA-Leti/DTBS, France
- 9:20** Augmented Medical Interventions
Philippe Cinquin - Member of the Computer Assisted Medical Interventions group and head of the CIC-IT, TIMC-IMAG Laboratory, France
- 9:45** Current trends on biochips
Yann Chevolot - Lyon Institute of Nanotechnology, France
- 10:10** Motion IC Systems for HealthCare and Wellness Applications
Cyrille Soubeyrat - Movea – France
- 10:35** Micropatterning cytophobic surfaces for cell normalization : applications in drug discovery and toxicology
Alexandra Fuchs - Founder and co-chief executive officer, Cytoo, France
- 11:00** Disease management and added value integrated drug delivery system
Philippe Laurent - Vice President Medical Affairs, Becton Dickinson, France
- 11:25** Fluorescence Molecular Imaging in Surgery
Philippe Rizo - Chief Scientific Officer, Fluoptics, France
- 11:50** Active lead for congestive heart failure resynchronization therapy
Renzo Dal Molin - Advanced Research Director, SORIN CRM
- 12:15** Questions
- 12:30** Lunch
